

# Basic Chemicals

## Providing a basis for industry

The Basic Chemicals business unit (BAC) is one of the most important suppliers of high-quality industrial chemicals in the world. Aromatic compounds play a prominent role in its wide product range. The business unit now holds a strong market position in all the important business divisions. Our success is based on a dedicated customer focus and strict market orientation as well as the ability to pinpoint market trends and identify new business opportunities at an early stage.

## The most important brands & products

- Aromatic compounds: chlorobenzenes, chlorotoluenes, cresols, nitrotoluenes and their derivatives
- Amines, benzyl products, hydrofluoric acid and sulfuric acid
- Phthalic anhydride, maleic anhydride
- Hydrazine Hydrate
- Trimethylol propane, Hexandiol
